

Souop Sylvain Brayan

Software Engineer | Web & AI Developer

Portfolio: <https://brayanj4y-terminal.vercel.app/> | GitHub: <https://github.com/brayanj4y> |

LinkedIn: <https://linkedin.com/in/brayan-j4y>

PROFESSIONAL SUMMARY

Passionate **Software Engineer** with experience in **web development, AI integration, and automation**. Skilled in building efficient, user-focused applications using **JavaScript, TypeScript, React, Next.js, Node.js, and Python**. Proven ability to design scalable systems that improve performance and usability. Strong collaborator with a focus on clean architecture and problem-solving. Driven to create innovative software that delivers real-world impact.

SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS, SQL

Frameworks: Next.js, React, Node.js

Databases: MySQL, PostgreSQL, SQLite

Cloud & Tools: AWS, Google Cloud, Supabase, Clerk, Neon, GitHub

Version Control: Git, GitHub

EDUCATION AND CERTIFICATIONS

- **B. Tech in Computer Engineering** (*Expected 2027*)
IUGET Institute of Technology – Douala, Cameroon
- **Higher National Diploma in Software Engineering** (*Oct 2023 – Jul 2025*)
JFN-IT University – Douala, Cameroon
Relevant Coursework: Web Development, Data Structures & Algorithms, Software Engineering Principles
- **Tinygs Surface Satellite Certification**

PROFESSIONAL EXPERIENCE

Software Developer Intern

Gracify Technology – Douala, Cameroon

Jul 2024 – Nov 2025

- Collaborated with the engineering team to **enhance the company's CRM interface**, improving user experience and workflow efficiency.
- Conducted a **comprehensive audit** of attendance tracking processes, identifying key inefficiencies in manual systems.

- Designed and implemented an **AI-based facial recognition system**, reducing manual entry by **over 80%** and improving data accuracy.
- Automated **HR attendance logging** to ensure real-time tracking and reliability in employee data reporting.
- Contributed to **system testing, deployment, and documentation**, ensuring maintainability and scalability of internal tools.

Junior Software Engineer

Digital Strategies CM – Douala, Cameroon

Dec 2024 – Jan 2025

- Developed a **task management system** that streamlined internal operations and improved team coordination.
- Built and launched a **nonprofit fundraising website**, enabling secure online donations and expanding community outreach.
- Worked closely with **design and backend teams** to ensure seamless integration and performance optimization.
- Participated in **code reviews and testing**, improving software reliability and reducing deployment errors.
- Assisted in **feature planning and post-launch maintenance**, ensuring consistent system updates and user satisfaction.

NOTABLE PROJECTS

Employee Face Recognition Attendance System

- Designed and implemented an **AI-powered attendance system** using computer vision to automate daily check-ins.
- Integrated **facial recognition with HR logging**, eliminating the need for manual entries.
- Achieved an **80% reduction** in administrative workload and improved accuracy of attendance data.
- Built a **Flask-based web dashboard** for real-time attendance tracking and reporting.
- Tech Stack: **Python, OpenCV, MySQL, Flask**

CodeAssist

- Developed a **browser-based AI code editor** that provides real-time coding assistance and debugging.
- Integrated **Gemini AI API** for intelligent code suggestions, explanations, and error fixes.
- Designed a **collaborative editing mode**, allowing multiple users to code simultaneously.
- Optimized performance to ensure smooth, installation-free operation directly in the browser.
- Tech Stack: **Next.js, Node.js, Gemini API**

Rushed AI

- Created a **no-code platform** that enables users to generate complete web apps and UI components instantly.
- Implemented **drag-and-drop functionality** with instant preview for non-technical users.
- Integrated **Supabase backend** for authentication, data storage, and deployment management.
- Focused on **scalability and fast rendering** through efficient API architecture.
- Tech Stack: **Next.js, Supabase, TypeScript**

Whispr

- Built an **anonymous messaging platform** prioritizing user privacy and message security.
- Implemented **self-destructing messages** to ensure no data trace remains post-delivery.
- Integrated **Firebase authentication** and real-time database synchronization.
- Designed a clean, responsive UI for a seamless mobile and desktop experience.
- Tech Stack: **React, Firebase, Clerk**

Zenote

- Developed an **AI-enhanced note-taking app** that combines Markdown editing with mind-mapping features.
- Implemented **semantic search and content summarization** using natural language processing.
- Designed a **cloud-synced workspace** for multi-device accessibility and collaboration.
- Focused on performance, intuitive UX, and smooth transitions between notes and mind maps.
- Tech Stack: **Next.js, Supabase, PostgreSQL**

ADDITIONAL SKILLS

- Strong communicator, Team player, Problem solver, agile mindset, Time management, and highly Adaptable.
- Knowledge on GitOps and GitHub Actions processes.

ENVIRONMENT

VS Code • Git & GitHub • Postman • Docker • Node.js Runtime • NPM & Yarn • RESTful API Development • JSON & GraphQL APIs • MySQL & PostgreSQL Databases • Supabase & Firebase Backends • Linux & Windows Development Environments • Next.js & React Frameworks • Browser DevTools • API Testing & Debugging • Agile Development
